OUR STORY

MEET SYNQ WORKWEAR

SYNQ, short for “synchronize”, is a verb for making things work together. Just like you sync your data with the cloud, your phone with your car, your meals with your drinks, ... Now it’s time to sync your workday as well, because ‘in SYNQ works well’.

synqworkwear.com

IN SYNQ[®]
WORKS WELL.

**PERFECTLY IN SYNQ
WITH YOUR WORKDAY.**

That’s what our workwear aims to be. So that you can focus on your passion. On what you do best and love most, without worries.

RELY ON SYNQ WORKWEAR WITH THE Q OF...

QUALITY

Rely on the long-standing reputation of Sioen Industries as a textile solution provider. Its dedicated team of experts, network of reputed suppliers, in-house test laboratory, own production facilities,... are your guarantee for great Quality.

QOMFORTABLE

The key to great workwear? Qomfort! Especially when you move. That's why all our work trousers have a comfortable fit with pre-bent trouser legs, conveniently placed pockets, a mechanical stretch main fabric,...

AQOUNTABLE

We take our responsibility, both as a brand, and as a company. For Sioen Industries Environmental, Social & Governance (ESG) is encoded in its DNA. As a brand, we follow their inspiring lead and try to make sustainable choices, wherever that is possible.

GOOD LOOQING

Whether you are working together in team or meeting up with clients, our extensive product range with modern designs and stylish colours assures that you will look the part!

MEET SIOEN

Sioen is the name and quality label of the world-renowned textile solution provider. Sioen develops, produces and distributes a wide variety of products within the world of technical textiles: yarns, fibres, colouring solutions, wovens and nonwovens, coated fabrics and protective clothing. Technical superiority is what binds all divisions.

With permanent investments in state-of-the-art machinery, innovation and talent, Sioen continuously lifts its products to new heights.

SIOEN'S 3 DIVISIONS

Find out more about [Sioen Industries](https://www.sioen.com) and its 3 divisions on [sioen.com](https://www.sioen.com)

Sioen Apparel

The number 1 innovator in the domain of high-quality protective clothing.

Sioen Technical Textiles

The world market leader in coated technical textiles.

Sioen Chemicals

The specialist in fine chemicals, offering tailor-made colouring solutions.

THE SIOEN APPAREL 'HOUSE OF BRANDS'

SIOEN

Founded in the 1960s, Sioen Apparel has built up a strong reputation in the protective apparel business. Its broad product range offers protection at work for firefighters, policemen, chainsaw users, rescue workers, windfarm operators, industrial labourers in high-risk environments,... The newest addition to its 'House of Brands', enables Sioen Apparel to provide a complete outfit for every single professional on the work floor, **making the group a one-stop shop for all your (work) apparel needs.**

MEET THE SYNQ SQUAD

The SYNQ Squad is a team of experienced professionals who test and evaluate all SYNQ workwear on the job. Their highly valuable input and feedback helps our developers and designers to create workwear that is completely **in sync with the needs and on-the-job requirements of professionals.**

EVERY FEEDBACK WE RECEIVE IS BEING EVALUATED, INCORPORATED IN THE DESIGNS AND TESTED AGAIN. TESTING OUR WORKWEAR REALLY IS A NEVER-ENDING PROCESS.

Jasmin Bultinck
Junior Product Manager SYNQ

WHAT DOES THE SYNQ TEST TEAM TEST?

Fabrics

The touch and feel of the fabrics, their flexibility and breathability. Are they sufficiently resistant to wear and tear? And comfortable enough to wear an entire workday long?

Fit

Do the clothes offer a perfect fit? Or are they rather snug or loose in specific places? Does the fit allow for sufficient liberty of movement, or could you use a little more stretch?

Protection

Do the winter items keep you nice and warm? Does the rainwear offer an outstanding barrier against water?

Pockets

Do you have all the pockets you need or could you use a little more storage space? Are the pockets intuitive and in all the right places? And what about their size?

Design

What do you think of the look of the clothing? Do you like the colours? Can you feel the boost of your professionalism?

DID YOU KNOW?

Apart from field-tests by the SYNQ squad, all our raw materials and finished products are also thoroughly tested by independent research institutes and at our in-house test facility.

Read more about Testing & Quality on p.74

SYNQ & SUSTAINABILITY

To be perfectly in sync with professionals is one thing. However, we also want to be in sync with nature and use its resources thoughtfully. At Sioen, sustainability is integrated across the entire company. For its latest brand, SYNQ, it's no different.

SUSTAINABLE COMPANY

As a family business with family values, Sioen sees Environmental, Social and Governmental subjects, as an integral and fundamental part of the company's DNA and corporate culture.

ESG is a source of innovation, competitive advantage and value creation for all stakeholders and therefore one of the cornerstones of the company strategy. It has been translated since decades in our company slogan "protection through innovation", making people's lives better.

A NEVER-ENDING PROCESS

At Sioen, sustainability is considered a process of continuous improvement. Our company is constantly assessing and improving processes and systems, investing in solutions to reduce our energy use, identifying new eco-friendly technologies, materials, innovations,... It really is a never-ending journey towards a greener, more sustainable future.

SUSTAINABLE BRAND

True to our company strategy, as a brand we are equally committed to reducing our impact on the environment.

That's why we try to incorporate a sustainable approach in everything we do: from eco-friendly fabric to packaging & design choices, but also by creating coherent collections and forming durable partnerships with suppliers.

High-quality fabrics and partnership

... for qualitative and robust workwear that endures more and lasts longer.

Sustainable packing

... wherever possible. Always looking for the perfect compromise between sustainable wins and meeting client's requirements.

Sustainable materials as a rule

... in over 75% of our fabrics. The only exception to this rule can be found in fabrics used for reinforcement and waterproof fabrics to guarantee high-quality strength and protection.

Workwear collections

... to optimise resources and guarantee continuity to our clients.

ANNUAL ESG REPORT

Every year, the Sioen group publishes an ESG report that summarises the company's social, environmental, and economic practices in order to become a more sustainable business.

Discover the full report via our CSR website (csr.sioen.com) and find out all the actions Sioen Industries sets intended to have a positive impact on its employees, business partners, surroundings and the broader environment.

YOUR WORKWEAR

FIND YOUR COLLECTION

To be perfectly in sync with the needs of various professionals, industries and companies, SYNQ workwear offers 3 different collections. Every collection has its own unique features & design elements and offers products ranging from various work trousers to compatible topwear items.

synqworkwear.com

FIND YOUR WORK TROUSERS

Looking for the perfect pair of work trousers? There are different types to answer the needs and preferences of professionals in various industries.

MAIN FEATURES OF SYNQ WORK TROUSERS

Even though every type of work trousers is unique, the different SYNQ work trousers also have a lot in common:

HIGH-QUALITY FABRICS WITH STRETCH

- Comfortable mechanical stretch main fabric in all work trousers
- Work trousers with extra 4-way Stretch **Cordura**® inserts

PRACTICAL POCKETS & LOOPS

- 3 types of work trousers with their own typical pockets
- 2 types of kneepad pockets: top-loading & bottom-loading
- **Cordura**® reinforcements at pockets & loops, where necessary
- Practical loop with detachable Q-ring for ID-badge

GREAT DESIGN & PROFESSIONAL LOOK

- Subtle-yet-striking reflective details
- Pre-bent legs for a well-fitted look
- Extendable hem (easily add 5 cm to your trouser legs)

DID YOU KNOW?

For a perfect fit, SYNQ work trousers and bib & braces come in 3 different inside leg lengths: **short, regular and long.**

WHAT TYPE OF WORK TROUSERS DO YOU NEED?

Looking for another type of trousers?
Check out the Sioen PPC offer.

There are 3 types of long work trousers available in the SYNQ & SCORE and the SYNQ & STRETCH collection. In the high-visibility SYNQ & SAFE collection, you will only find service trousers and knee pocket trousers.

SERVICE TROUSERS

*The pockets you need.
No more, no less.*

KNEE POCKET TROUSERS

*One can always use a little
more storage space...*

HOLSTER POCKET TROUSERS

PRODUCT FACTS

STANDARDS & CERTIFICATION

To provide professionals with workwear that offers the required protection they need for their job, we do not only test our workwear thoroughly ourselves, our work clothing is also certified according to high international standards.

EN 14404

EN 14404 PROTECTION FOR KNEELING WORK

This standard describes the test methods and specifies the requirements for different types of knee protectors for working in a kneeling position. Garments and kneepads that comply with this certification are aimed to reduce and prevent injuries and risks that may occur immediately or over time.

SYNQ® JEROM KNEEPADS

All SYNQ work trousers and bib & brace overalls with knee pockets are certified in combination with the SYNQ® Jerom kneepads. They offer a protection type 2, level 1: which means they protect against penetration of small objects and are suitable for use on flat and uneven floor surfaces.

EN 342

EN 342 PROTECTION AGAINST COLD

This standard describes the test methods and specifies the requirements for clothing offering protection against the effects of cold environments equal to or below -5°C. Garments that comply with this certification are aimed to protect the wearer against the risk of body cooling.

The EN 342 norm takes 3 parameters into account:

- Resultant effective thermal insulation: expressed in m²K/W
- Air permeability: there are 3 levels, class 3 is the most windproof
- Resistance to water penetration (optional): there are 2 levels, class 2 is the most waterproof

In the SYNQ workwear range, all EN 342 certified workwear items also comply with the EN 343 standard for protective clothing against rain.

EN 343 PROTECTION AGAINST RAIN

This standard describes the test methods and specifies the requirements for clothing offering protection against the effects of precipitation, such as rain and snowflakes, fog and ground humidity. The clothing is not made to protect against other effects, such as water splashes and waves.

EN ISO 20471 HIGH-VISIBILITY PROTECTION

This standard describes the test methods and specifies the requirements for high-visibility clothing. Garments that comply with this certification offer an increased visibility of the wearer during the day, at twilight and at night.

EN ISO 20471 is divided into three classes, based on the amount of fluorescent fabric and retroreflective tape used in the garment. **The more fluorescent and reflective material present in the garment, the higher the class** ➔

The EN 343 norm takes 3 parameters into account:

- Resistance to water penetration: there are 4 classes, class 4 offers the highest resistance to water penetration.
- Water vapour resistance: there are 4 classes, class 4 offers the highest breathability.
- Rain tower test (optional): tested on a ready-made garment. If not measured, this parameter is marked with an X on the symbol.

All EN 343 certified SYNQ items were subjected to the rain tower test at Sioen's in-house test facility.

	Fluorescent material	Retroreflective material
CLASS 1	at least 0.14 m ²	at least 0.10 m ²
CLASS 2	at least 0.50 m ²	at least 0.13 m ²
CLASS 3	at least 0.80 m ²	at least 0.20 m ²

Choose your class of high-visibility workwear in accordance with your specific work situation and the risks you are exposed to. If you are not sure which high-visibility class your job requires, always check with your safety advisor.

Read more about these standards & certification at synqworkwear.com

EN 13758 PROTECTION AGAINST UV

This standard describes the test methods and specifies the requirements for clothing offering protection against UV radiation from the sun. Garments that comply with this certification are aimed to reduce negative effects from the sun by blocking ultraviolet rays type A (UVA) and B (UVB).

SYNQ UV protective topwear offers UPF50+ protection, allowing only 1/50th of UV radiation to penetrate the fabric and reach the skin. In other words: it shields you against 98% of the sun's rays.

OEKO-TEX® STANDARD 100 CERTIFIED TRUST

This world-renowned label for textiles tested for harmful substances guarantees high product safety and inspires trust.

All SYNQ workwear products are certified according to this label, which means that they have been tested for harmful substances and were evaluated to be completely harmless for human health.

EN ISO 13688 STANDARD FOR PROTECTIVE CLOTHING

This International Standard specifies general performance requirements for protective clothing and diligently sees to questions like: Is it ergonomically designed? Is it harmless for your health? How is the clothing affected by washing and ageing? Does the item have a clear size designation? And is all the needed, protective information correctly marked?

All certified SYNQ workwear also complies with the EN ISO 13688 standard.

SIOEN - PPC

Are you looking for another CE certification or a higher level of protection? Our sister brand, **Sioen PPC**, offers a wide range of high-quality and highly technical solutions to serve many different applications and markets, like the food industry, agricultural industry, petrochemical industry, steel industry,...

Discover the entire Sioen PPC product range at: sioen-ppc.com

FIND YOUR CORRESPONDING SIZE

Use this chart to look up your corresponding size from a different country. Note that in the SYNQ product range, the EU size is leading. To avoid all confusion, we absolutely recommend to place your orders in EU sizes as well.

EU (ORDER SIZE)	42	44	46	48	50	52	54	56	58	60	62	64	66	
TOPWEAR	XS	S	M	L	XL	2XL	3XL	4XL						
FR	36	38	40	42	44	46	48	50	52	54	56	58	60	
UK (WAIST)	28	30	32	33	34	36	38	40	42	44	46	48	50	

TAKE YOUR BODY MEASUREMENTS IN 3 STEPS:

STEP 1: Preparation phase

Find yourself a tape measure, take off your shoes and put on well-fitted clothes. Ideally, you get someone else to assist you, since that will assure a nice and straight up position. Otherwise, take extra care to stand up straight and breathe normally.

STEP 2: Take your body measurements

Take the measurements you need, as indicated in the picture. Place the tape measure flat against your body. Make sure it is snug but not too tight.

A = Waist: Measure horizontally around the waist.

B = Chest: Measure horizontally under the arms, around the widest part of the chest.

C = Total body length: Measure from the top of the head till the ground.

D = Inside leg length: Measure from the crotch of the trousers till the ground.

E = Hips: Measure horizontally around the hips.

STEP 3: Find your perfect fit

Consult the size charts to find your perfect fit. When it comes to trousers sizes, note that your inside leg length will have an impact on the size you need to choose:

Inside leg length \pm 76cm = choose size "S" (= Short inside leg length)

Inside leg length \pm 81cm = choose size "R" (= Regular inside leg length)

Inside leg length \pm 86cm = choose size "L" (= Long inside leg length)

DO YOU NEED A LITTLE EXTRA LENGTH?

The extendable hem is a practical design feature that allows you to easily lengthen the legs of your trousers. Simply undo the blue thread **to add an additional length of 5cm to your work trousers**, without the help of a tailor. Because the hem is double finished, the trouser legs will still look neat at the hem.

DID YOU KNOW?

In high-visibility clothing, there is always a number mentioned below the wash tub symbol. This indicates the maximum number of washing cycles allowed.

If you wash it more often, the garment will no longer comply with the EN ISO 20471 high-visibility standard.

WASH & CARE

Find an overview of all laundry symbols used in SYNQ workwear. Always check the care label inside your garment, since instructions are likely to vary in function of the fabrics.

WASHING

	Max. 60°C
	Max. 60°C, gentle cycle
	Max. 40°C
	Max. 40°C, gentle cycle
	Hand wash only
	Do not wash

BLEACHING

	Do not bleach
---	---------------

DRYING

	Tumble dry, normal process (max. 80°C)
	Tumble dry, mild process (max. 60°C)
	Do not tumble dry

IRONING

	Iron at moderate temperature (max. 150°C)
	Iron at low temperature (max. 110°C)
	Do not iron

DRY-CLEANING

	Dry-cleaning allowed with solvent based stain removers
	No professional dry-cleaning allowed

SUITABLE FOR CARE BY A PROFESSIONAL LAUNDRY SERVICE

For longer-lasting protective workwear, professional care is absolutely the way to go. That's why SYNQ workwear is perfectly in sync with this process. For high-vis workwear, we recommend professional care to keep the fluorescent and reflective materials optimally preserved.

	Look for this symbol to easily recognise all SYNQ workwear that is suitable for care by a professional laundry service.
---	--

PERSONALISE YOUR WORKWEAR

By making sure that our designs offer the perfect place for your company name and/or logo and that every garment is tested in-house for the 2 most commonly used printing techniques, we can guarantee that our workwear is completely in sync with the personalisation process. All that's left for you is to choose!

CHOOSE THE PERFECT PLACE

Every item offers a variety of choice.
Just a few options:

Front side

Back side

CHOOSE YOUR PRINTING TECHNIQUE

Both techniques were tested on our workwear by the in-house R&D team to guarantee a perfect end result.

Embroidery

Embroidery is perfect to give your garment a high-end, qualitative look. Choose this decorative technique for a durable result that withstands the rigours of daily wear and constant washing. It is best suited for less elaborate designs and for solid colours to create a clean, polished and professional appearance.

Choose this technique for more robust fabrics, such as all of our work trousers.

Do not use embroidery on your rain & cold items.

Heat transfer print

This easy and cost-efficient technique is especially suited for detailed designs with an array of colours. With heat transfer prints, the application duration, temperature and pressure are important factors to take into account. Make sure to check with your printing partner which settings apply for the type of heat transfer and fabric you've chosen.

Almost every SYNQ workwear item is suitable for heat transfer print.

The fleece and midlayer jackets are not suitable for this technique.

THE PERSONALISATION OF CERTIFIED WORKWEAR

Note that personalising certified garments, can affect the protection level of the garment. Always contact your safety advisor in advance for more information.

EN ISO 20471: Adding your name or logo will reduce the surface of fluorescent fabric, which may impact the garment's safety class. Note that the available cm² for personalisation can vary per garment and size.

EN 343: Certain techniques, like embroidery, can damage the membrane of your waterproof fabric. Choose a different method, like heat transfer print to personalise your rainwear.

EN 342: For the personalisation of padded EN 342 garments our designers have added a practical hidden zip closure for branding in the back lining. This feature can also be found in all SYNQ rain jackets with an inner mesh lining.

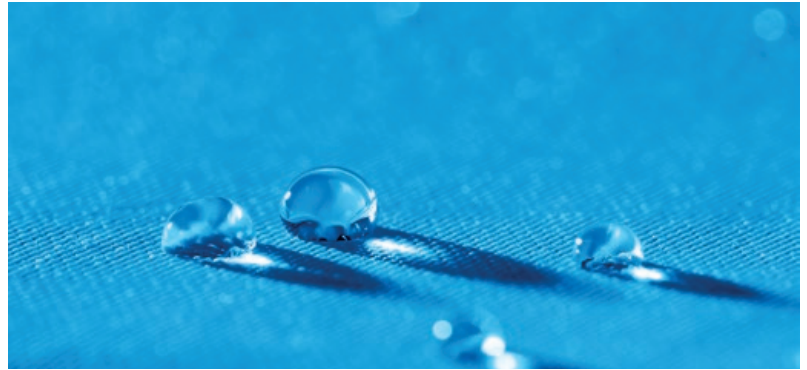

FABRICS

Read more about the 3 fabric groups used in SYNQ workwear. Every fabric was carefully selected by our product managers and thoroughly tested at our own in-house test laboratory, by a professional laundry service and – obviously – also by our test team. As a general rule, all SYNQ fabrics are OEKO-TEX® certified and meet our high demands in terms of durability.

SIOPOR® WATERPROOF FABRICS

“High-quality, breathable rain items with proven wind- and waterproof protection”

All rainwear items in the SYNQ collections are made with Sioen’s Siopor® technology: a technical fabric that protects you from all weather conditions — wind, cold & rain — without sealing heat and moisture in.

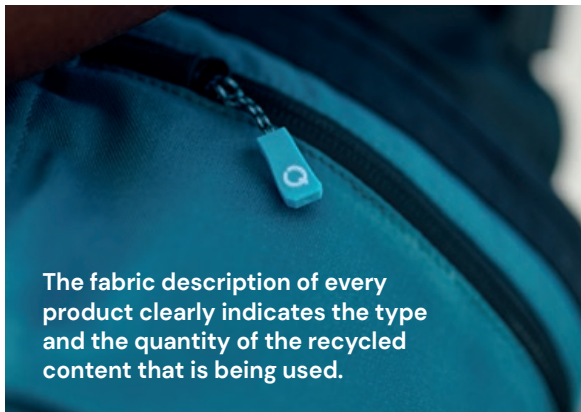

SIOPOR® LIGHT

Lightweight 2-layer fabric (215 g/m²). The water repellent polyester outer layer is combined with a hydrophilic polyurethane membrane on the inside.

SIOPOR® STRETCH

Lightweight 3-layer fabric (170 g/m²) with high mechanical stretch. The 100% polyester outer layer is combined with a breathable PU membrane and a 100% polyamide tricot backing.

The fabric description of every product clearly indicates the type and the quantity of the recycled content that is being used.

FABRICS WITH RECYCLED CONTENT

“Working in sync with nature”

Most fabrics used in SYNQ garment are made of recycled materials or contain partially recycled materials. The only exception to this rule are the high-performance fabrics used for reinforcements and for waterproof jackets and trousers.

CORDURA® REINFORCEMENT FABRICS

**“Your guarantee for strong,
long-lasting workwear”**

For excellent tear strength and resistance to abrasion, SYNQ work trousers are reinforced with Cordura® fabric. Depending on the purpose and the area where the fabric is used, there are 3 different types:

CORDURA® – REINFORCEMENT

Robust 100% polyamide fabric used to reinforce pockets, hems, loops and the knees of knee pocket trousers with a mechanical stretch main fabric only.

4-WAY STRETCH CORDURA® – KNEE POCKETS

This fabric, combining strength (93% polyamide) and stretch (7% elastane), is used to reinforce knee pockets in work trousers with additional stretch inserts.

4-WAY STRETCH CORDURA® – STRETCH INSERTS

With a higher amount of elastane stretch fibres (11%), this fabric is used for all stretch inserts.

OEKO-TEX® STANDARD 100 LABEL

All SYNQ workwear products are certified according to the OEKO-TEX® STANDARD 100 label. This world-renowned label for textiles tested for harmful substances guarantees high product safety and inspires trust.

TESTING & QUALITY

All raw materials, whether still in development or long-standing, are thoroughly tested by independent research institutes, as well as in Sioen's own R&D centres and labs.

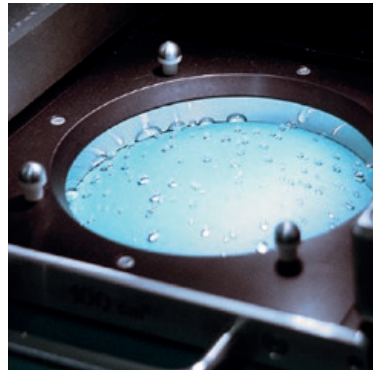

These in-house test facilities are fully equipped with the latest testing equipment so that all testing for tear and breaking strength, flame retardancy, thermal radiation, chemical resistance, bullet and knife impact, water column, colour fastness, ageing,... can (also) be performed in-house.

A few of the tests that are relevant to SYNQ workwear are:

ABRASION RESISTANCE

At work, you bump against objects, rub along surfaces, carry stuff in your arms,... Where your clothes meets other objects, you don't want them to start pilling. The **Martindale test**, aka. 'the rub test', assesses the durability of fabrics. It identifies how long a fabric remains intact when it is exposed to wear and tear.

WATER-RESISTANCE

You want your rainwear to keep you dry, right? To guarantee an excellent protection from the rain, we perform several tests: the **spray test** to determine the water repellency, the **hydrostatic pressure test** to test the resistance to water penetration and the **rain tower test** to assess the waterproofness of a finished garment.

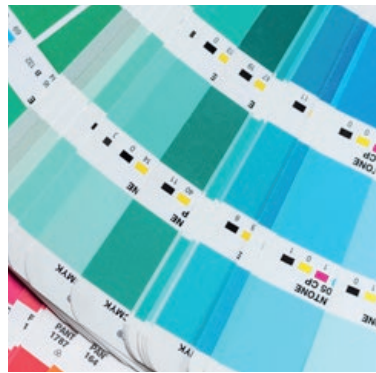

TEAR & TENSILE STRENGTH

Rest assured that your work clothes won't tear or rip easily. We test both the **tear resistance** of fabrics to determine how well a material can withstand the effects of tearing and perform a **tensile strength test** to measure the force that is required to pull something to the point where it breaks.

WASHING TESTS

To preserve your clothing's look & protection level, we determine the **washing durability** of finished garments to make sure that both the fabric and the features can withstand a specified number of washing cycles. We also team up with professional laundries to verify that our garments are suitable for their care process.

LAB DIPPING

When you assemble an entire, uniform work outfit, you want all colours to match nicely, don't you? That's why, before production, lab dips are made of all different fabrics used in our product range to make sure that one colour is consistent throughout all fabrics and collections.

IN THE FIELD TESTING

The real test however, happens on the work floor. To make sure that our work clothes are up to par with your professional on-the-job requirements, we have teamed up with the SYNQ Squad **test team**. This group of experienced pros tests our workwear in the field and gives the developers their highly valuable input.

OVERVIEWS

SYNQ USPs

Discover below the USPs of SYNQ workwear and find out just a few of the reasons why “in SYNQ works well”.

COHERENT COLLECTIONS

By making sure the colour and size ranges are aligned, we make it easy for you to see which products you can choose from to **assemble an entire outfit** for your team.

Stick to one collection or simply **mix & match** between collections to combine functionalities, fittings and products from different ranges.

COMFORT & FUNCTIONALITY

The use of stretch fabrics ensure additional comfort and functionality. You can always count on **mechanical stretch** in the main fabric of your SYNQ trousers, or choose a pair with additional **stretch inserts** for an even higher level of comfort.

Of course, you'll find all the necessary pockets to store your tools and lots of other useful product features that make your professional life a whole lot easier.

CERTIFIED PROTECTION

SYNQ workwear offers protection through its **high-quality fabrics & finishing** on the one hand, but also through elaborate **testing**, both in Sioen's own R&D centres and labs, as well as by independent research institutes. Combined with field-testing by the **SYNQ Squad**, you get workwear that's tested and approved for the job!

To top that off, you can count on **certified protection** for high visibility, knee protection, rain and/or cold protection & UV sun protection.

ECO-FRIENDLY

Various SYNQ items are made with **recycled polyester** or have another type of recycled material in the fabric composition. Also, SYNQ workwear carries the **OEKO-TEX® standard 100** label, meaning there are no harmful substances in our workwear. This makes them a better and safer choice for your health.

Moreover, **Corporate Social Responsibility** at Sioen is an integral part of the company strategy. Sioen also publishes an **annual ESG report** about the company's Environmental, Social and Governance impacts.

GOOD LOOKING ON THE JOB

Whether you are working together in a team or meeting up with clients, our modern designs assure that you will look professional and stylish!

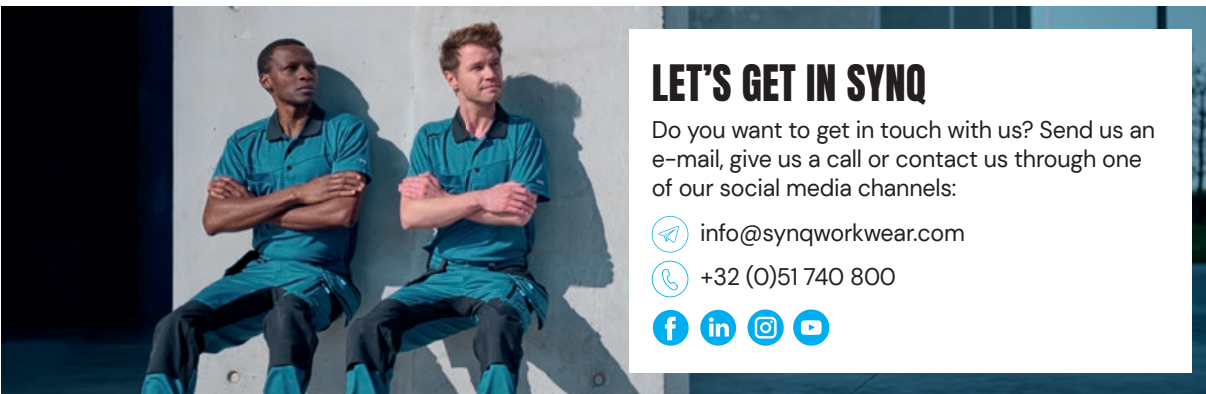

- Different fittings to choose from.
- Stylish designs & colours to match with your company branding.
- Ample place for your company logo.
- And don't forget... mix & match between collections!

ONE-STOP SHOP

SYNQ workwear forms a strong combination with the other Sioen brands. For instance, **Sioen PPC, Professional Protective Clothing**, offers a wide range of high visibility and multinorm workwear, as well as solutions for cold storage and food, complemented with an extensive all weather range.

This makes for a one-stop shop for all your workwear needs!
